

PEAKfresh Pallet Cover Instructions

Using PEAKfresh pallet covers is simple however, there are a few important steps to follow.

- 1) Always pre-cool your produce to the temperature at which it will be stored or transported.
- 2) After pre-cooling is complete, simply place the pallet cover on your pallet.
- 3) Blunt the sharp edges of each top corner of the pallet.
- 4) Be sure to keep the bottom of the pallet cover open so that air can flow through.
You can staple the pallet cover in the bottom corners to keep it secure - but only in the corners

Keep the bottom open and free and clear so there is continuous airflow.

Blunt the sharp edges of each top corner.

Staple pallet cover directly to corner of pallet.

Do NOT let the pallet cover go all the way down to the floor.
