# **Section 4 - First Aid Measures**

# 4.1 Description of first aid measures

Inhalation	• IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. Give artificial respiration if victim is not breathing. If signs/symptoms continue, get medical attention.
Skin	• For thermal burns, flush or submerge effected area in cold water to dissipate heat. Cover with clean bandage material. Do not peel material from skin. Get medical attention. For contact at ambient temperatures, wash with soap and water.
Еуе	<ul> <li>If dust or molten material contacts the eye, immediately flush with plenty of water for at least 15 minutes. If irritation persists, get medical attention immediately.</li> </ul>

Low Density Polyethylene	Westlake Internal SDS #: PE004
Ingestion	• First aid is not expected to be necessary if material is used under ordinary conditions and as recommended.
4.2 Most importai	nt symptoms and effects, both acute and delayed
	Refer to Section 11 - Toxicological Information.
4.3 Indication of a	any immediate medical attention and special treatment needed
Notes to Physician	• Burns should be treated as thermal burns. The material will come off as healing occurs; therefore, immediate removal from the skin is not necessary.
Section 5 - Firefig	phting Measures
5.1 Extinguishing	media
Suitable Extinguishir	
Unsuitable Extinguis Media	hing     None known.
5.2 Special hazar	ds arising from the substance or mixture
Unusual Fire and Ex Hazards	<ul> <li>Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.</li> </ul>
Hazardous Combust Products	• Carbon dioxide, carbon monoxide, formaldehyde, acetaldehyde, irritating smoke.
5.3 Advice for fire	»fighters
	<ul> <li>Wear positive pressure self-contained breathing apparatus (SCBA). Structural firefighters' protective clothing will only provide limited protection.</li> </ul>
Section 6 - Accide	ental Release Measures
6.1 Personal prec	autions, protective equipment and emergency procedures
Personal Precaution	eyes. Wear appropriate personal protective equipment, avoid direct contact.
6.2 Environmenta	Il precautions
	<ul> <li>No special environmental precautions necessary.</li> </ul>
6.3 Methods and	material for containment and cleaning up
Containment/Clean-u Measures	<ul> <li>Avoid generating dust.</li> <li>Use clean nonsparking tools to collect material.</li> <li>Dust deposits should not be allowed to accumulate on surfaces, as these may form ar explosive mixture if they are released into the atmosphere in sufficient concentration.</li> </ul>
6.4 Reference to	
	<ul> <li>Refer to Section 8 - Exposure Controls/Personal Protection and Section 13 - Disposal Considerations.</li> </ul>
Section 7 - Handl	ing and Storage
7.1 Precautions for	or safe handling
	<ul> <li>Avoid contact with molten material; do not breathe fumes, vapors, dust or sprays from molten or burning material. When processing at &gt; 600°F (315°C), consider use of a respirator to avoid breathing decomposition products.</li> </ul>

breathing decomposition products.
Do not use in areas without adequate ventilation. Minimize dust generation and accumulation. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Dry powders can build static electricity charges when subjected to the friction of transfer and mixing operations. Provide adequate precautions, such as electrical grounding and bonding, or inert atmospheres.

 Use appropriate Personal Protective Equipment (PPE) Avoid contact with skin and eyes. Do not breathe dust. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco.

#### 7.2 Conditions for safe storage, including any incompatibilities

- Storage
- Keep container closed and in ventilated area, away from ignition sources, heat, open flames, and direct sunlight. Do not store with incompatible materials.

#### 7.3 Specific end use(s)

• Refer to Section 1.2 - Relevant identified uses

# 7.4 Other Information

• For prevention of fire and explosion, keep from contact with incompatible materials. Minimize dust generation and accumulation. Because product may accumulate a static charge, use proper bonding and/or grounding procedures prior to transfer. In the United States of America, refer to NFPA® Pamphlet No. 654, "Prevention of Fire and Dust Explosions from the Manufacturing, Processing, and Handling of Combustible Particulate Solids, 2006 edition."

#### Section 8 - Exposure Controls/Personal Protection

8.1 Control parameters	
Exposure Limits/Guidelines	No applicable exposure limits available for product or components.
8.2 Exposure controls	
Engineering Measures/Controls	<ul> <li>Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. Supplementary local exhaust ventilation, closed systems, or respiratory and eye protection may be needed in special circumstances; such as poorly ventilated spaces, very hot processing, evaporation of liquids from large surfaces, spraying of mists, mechanical generation of dusts, drying of solids, etc.</li> </ul>
Personal Protective Equipment	
Respiratory	• For limited exposure use an N95 dust mask. For prolonged exposure use an air- purifying respirator with high efficiency particulate air (HEPA) filters. Follow the OSHA respirator regulations found in 29 CFR 1910.134 or European Standard EN 149. Use a NIOSH/MSHA or European Standard EN 149 approved respirator if exposure limits are exceeded or symptoms are experienced.
Eye/Face	Wear safety goggles.
Hands	• Wear thermally resistant gloves and long sleeves when handling molten product.
Skin/Body	Wear long sleeves and/or protective coveralls.
Environmental Exposure Controls	Follow best practice for site management and disposal of waste.
