

PEAKfresh Box Liner Instructions

Using PEAKfresh box liners is simple however, there are a few important steps to follow.

- 1) Always pre-cool your produce post-harvest to the temperature at which it will be stored or transported.
- 2) Line the carton with your PEAKfresh bag.
- 3) After produce pre-cooling is complete, place your produce in the lined carton.
- 4) Simply fold the bag over and keep your 'cool-chain' closed.

Line the carton with your PEAKfresh bag and then place your pre-cooled produce inside.

Simply fold the bag over and keep your 'cool-chain' closed.

Produce can be removed when required and the bag refolded. No need for any clips or seals!
